Bangalore, India | +91 7348829440 | tanishams225@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Information Science & Engineering undergraduate with hands-on experience building AI-powered full stack solutions using open source technologies across front end and back end. Delivers Python-based REST API services, integrates algorithmic components into production-style systems, and collaborates on architecture, technology stack, and user experience decisions through the SDLC. Good understanding of data structures and algorithms fundamentals, and Agile methodologies, quick learner, strong communicator, and team player with a keen sense of usability and design.

CORE COMPETENCIES

- **Languages:** Python, Java, JavaScript, HTML, SQL, Object-Oriented Programming (OOP)
- **Full Stack & APIs:** Flask, FastAPI, Node.js, REST API Design & Integration, Front-End & Back-End Development, SDLC
- **AI / ML & Data:** AI-Powered Application Development, Fundamentals of Data Structures, ML Ops exposure, Prompt Engineering, Model Integration
- **Databases:** PostgreSQL, MySQL, MongoDB, Relational Data Modeling
- **Tools & Practices:** Git, GitHub, AWS, Agile, Testing & Debugging, Version Control

INTERNSHIP EXPERIENCE

AI & ML Intern - Embrizon Technologies Pvt. Ltd.

Oct 2024 – Nov 2024

- Built and deployed a Python full stack backend service with REST API endpoints powering a predictive ML algorithm for a Smart Healthcare Assistant, achieving 85% prediction accuracy.
- Applied OOP design principles and clean architecture to keep the codebase modular, testable, and easy to extend across the stack.
- Used Git version control and Agile sprint-based workflows while collaborating with a cross-functional engineering team on tech-stack and design decisions.

KEY PROJECTS

Healio - AI Doctor with Vision & Voice

Apr 2026 – May 2026

Python, FastAPI, Gradio, REST APIs, AI Integration

- Designed and built a FastAPI backend that orchestrates multiple AI services (speech, language, image analysis) behind simple REST endpoints, turning a complex multi-service AI pipeline into a single, easy-to-consume full stack application.

AI-Based Automated CCTV Surveillance for Women Safety

In Progress – 2026

Python, YOLOv8, YAMNet, MediaPipe, OOP, System Architecture

- Building a scalable, modular backend architecture running 3 parallel AI inference services, applying OOP-based design patterns for maintainability and targeting sub-20ms end-to-end latency.

AI-Based Public Speaking Tutor

Sep 2025 – Nov 2025

Python, Flask/FastAPI, JavaScript, Full Stack Development

- Built and deployed Flask/FastAPI REST API endpoints for real-time front-end/back-end data processing, achieving under 2-second feedback latency; tested and debugged endpoints for reliability.

EDUCATION

Bachelor of Engineering - Information Science & Engineering

Aug 2023 – Jun 2027

Atria Institute of Technology, Bangalore | CGPA: 8.23/10 | Currently in 7th Semester

CERTIFICATIONS

- Infosys Springboard - AWS Certified, Full Stack React & MERN Stack (2025–26)
- TNS India Foundation - Java Full Stack Development; MySQL, Collaboration & Communication (2026)
- NPTEL - Database Management Systems (2025)

LEADERSHIP & EXTRACURRICULAR

Event Manager - Entrepreneurship Cell, Atria (powered by E-Cell IIT Bombay)

- Planned and executed entrepreneurship events, workshops, and networking sessions, coordinating cross-functional teams, resources, and stakeholders end-to-end.

STRENGTHS

Analytical & Algorithmic Problem Solving | Simple, Effective Design Thinking | Cross-Functional Collaboration | Adaptability | Attention to Detail | Time Management | Eagerness to Learn
